Microgate Witty SEM

The Witty SEM traffic lights can be used alone or in combination with the Witty light barriers. The Witty SEM is controlled wirelessly with a controller. Up to 8 traffic lights can be used simultaneously. The system offers preset tests, but also allows you to configure your own tests.

Possible applications:

- Start lights with or without countdown
- Execution of agility or change of direction tests with or without light barriers
- Reactivity tests with cognitive-motor component
