

Vicon Peak Motus 10

The Motus 10 video analysis from Vicon enables 2D and 3D movement analysis. Videos will be recorded with the video capturing tool Tempo. By a simple mouse click you can integrate your video clips into the Motus 10 software and analyze it. Analysis can be done in 2d/3d and analogous/digital. Interfaces like USB-3, USB-2, GigE, HDV, DVC, IEEE can link the software to various devices e.g. all analogous devices which can be connected to a A/D charger such as EMG, forceplates.
